

Supporting people with a learning disability and autistic people to get the right care, at the right time, in the right place with more people cared for at home.

### Dynamic support registers (DSR)

- For adults, children and young people
- A tool used in a local area to identify people at risk or may become at risk of admission to a mental health hospital setting without specific and timely dynamic support.
- Each person is given a RED, AMBER or GREEN rating dependent on risk - or BLUE, a separate rating identifying those children, young people and adults currently in inpatient services.

### Care (Education) and Treatment Review (CETR)

- For adults, children and young people
- A meeting to talk about people at risk of going into a mental health hospital and who are already in a mental health hospital.
- Make sure the person and their family are listened to.
- Makes a plan to support people to get the treatment they need.
- Each time a C(E)TR takes place, a review of the red, amber or green rating on the DSR takes place. A record of C(E)TR recommendations kept on the DSR record.
- The dynamic support risk stratification process should include a review of community C(E)TR recommendations and inpatient C(E)TR recommendations for people at risk of readmission.

Keyworkers make sure that children, young people and families get the right support at the right time and that local systems are responsive to fully meeting the young people's needs in a joined up way. More information about keyworkers can be found at [www.england.nhs.uk/learning-disabilities/care/children-young-people/keyworkers](http://www.england.nhs.uk/learning-disabilities/care/children-young-people/keyworkers)
